Architecture Overview

Partner Integration Background

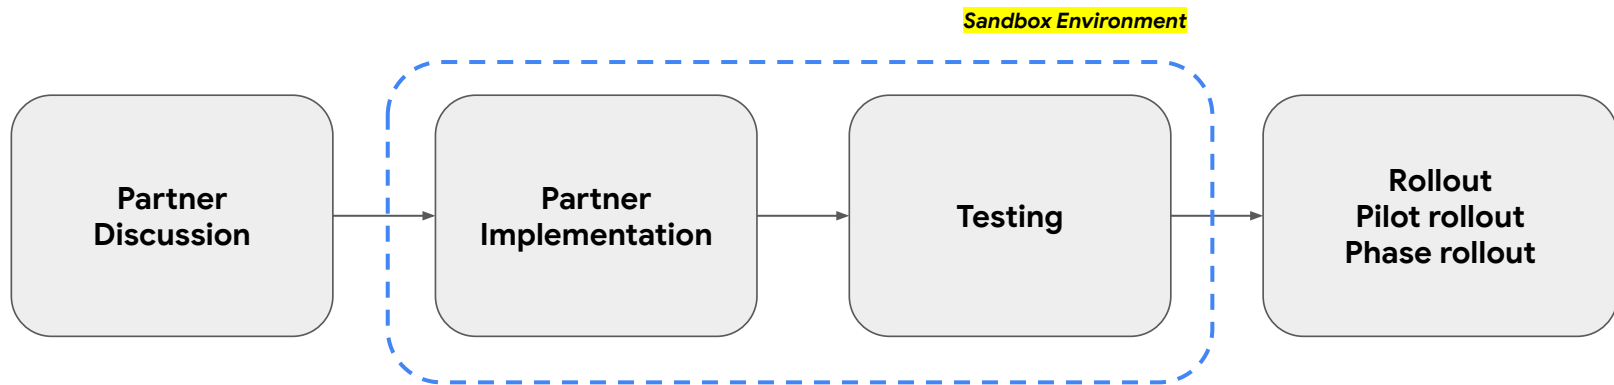

Order Flow:

- LINEMAN system places orders directly into the Partner POS system.
- At the same time, orders continue to appear in the Wongnai Merchant App (WMA) for restaurant staff visibility.

Fallback Handling:

- If the system fails to deliver an order to the Partner POS, the order will still be sent to WMA.
- This ensures restaurants never miss an order, even in the event of integration or connectivity issues.

Partner Integration Process

API Summary (4 mandatory, 6 optional)

[API Spec \(Master\)](#)

Scope	API	Required	Definition
Authentication	Authentication	Mandatory	Partner system can access to LINE MAN system
Menu	Menu sync	Mandatory	Partner can sync menu to LINE MAN.
Menu	Trigger sync menu	Mandatory	LINE MAN can trigger sync menu to partner
Menu	Menu sync notification	Optional	LINE MAN notifies partner about the menu sync result
Menu	Update menu item status	Optional	Partner can sync menu item status for some menus
Menu	Update menu propertyValue status	Optional	Partner can sync menu option item status for some option
Order	Place order notification	Mandatory	LINE MAN notifies new order contains all order details including price, items, order id etc.
Order	Status update notification	Optional	LINE MAN notifies order status if the order status is finished or canceled.
Order	Order update notification	Optional	LINE MAN notifies order detail change if the order is edited
Restaurant	Force close/open restaurant	Optional	Partner can force close/open their store on LINE MAN from their POS

Authentication

API Walkthrough

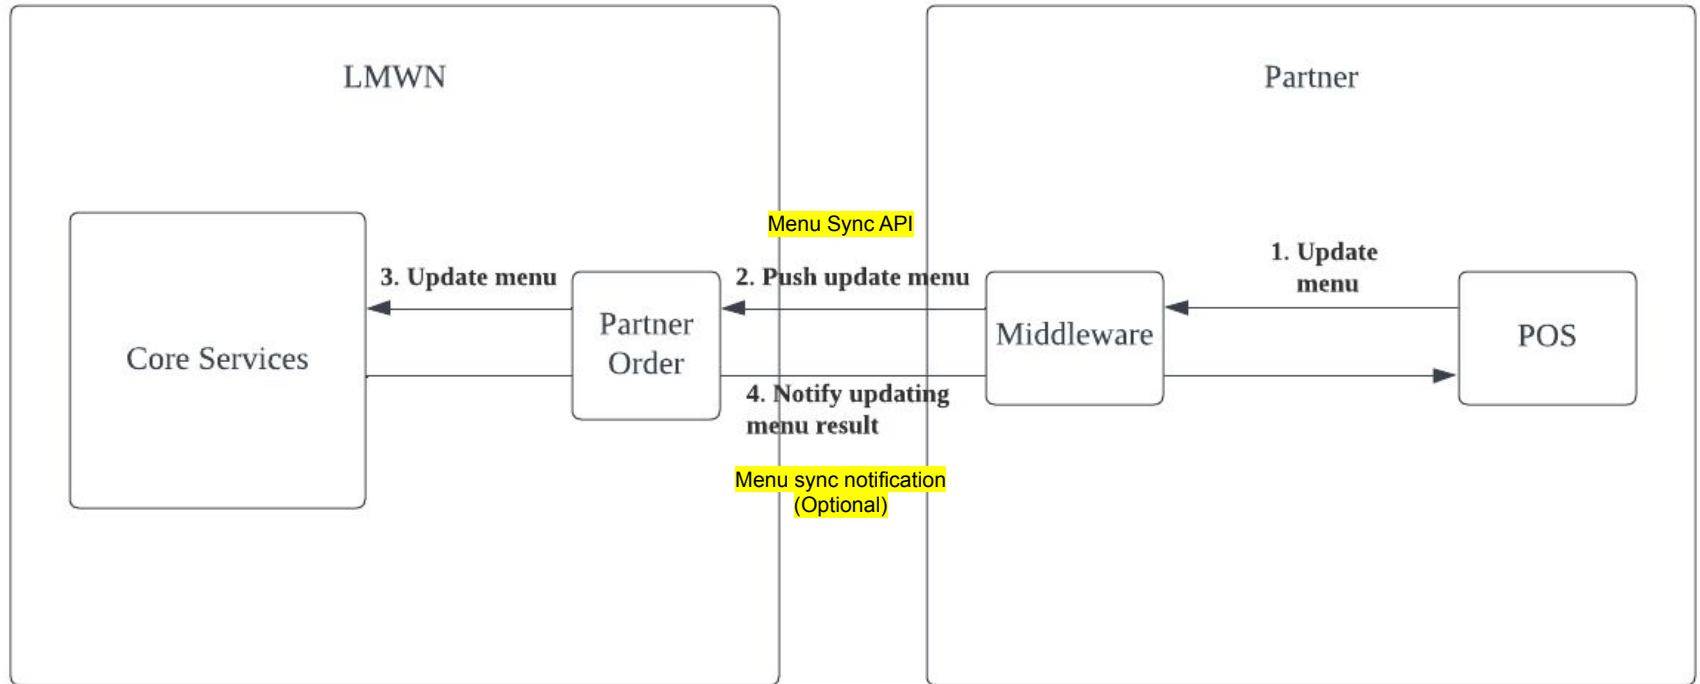

Authentication

- OAuth 2.0 - Client Credential Type
- Both sides need to authenticate with each other

Menu

API Walkthrough

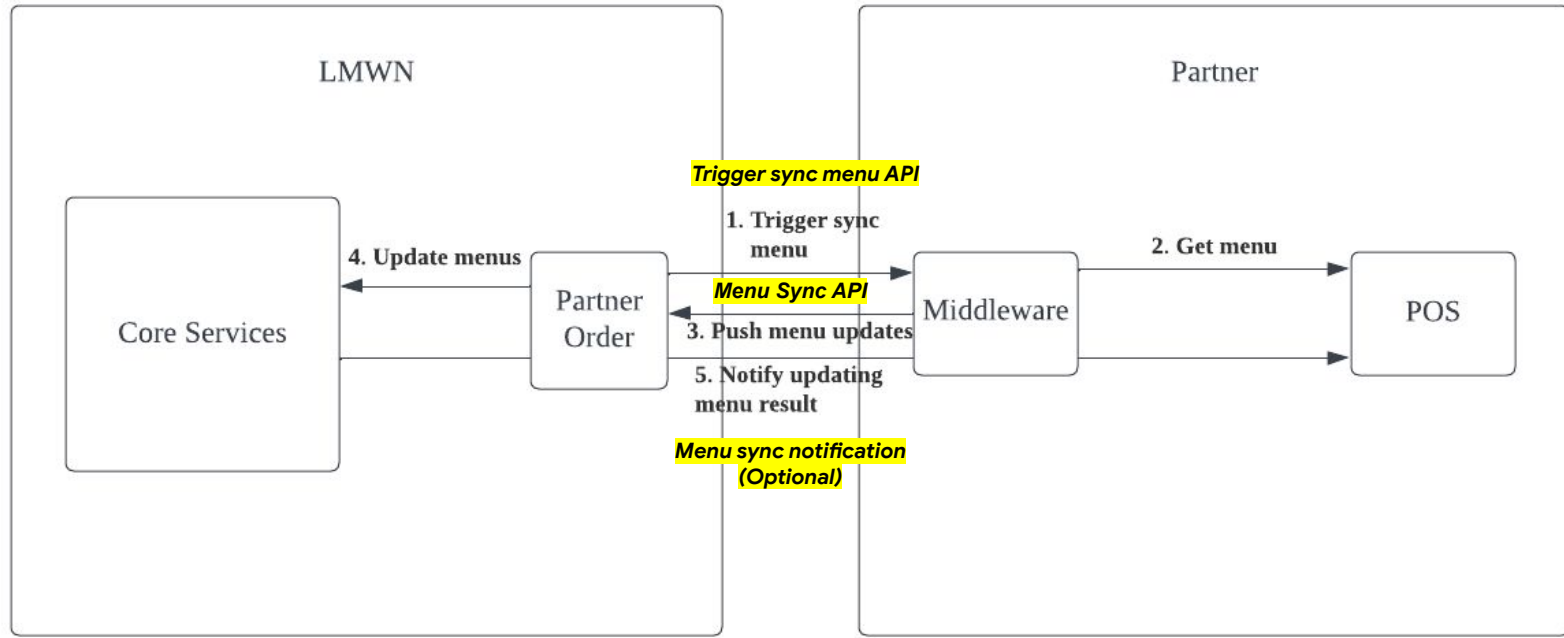

Sync Menu Workflow

Sync Menu Workflow

API	Definition
Menu sync	Partner can sync menu to LINE MAN. Whenever the menu/menu status are changed on the partner system, partner needs to push the entire menu snapshot to LINE MAN. • We currently support only push menu workflow • Partner can update menu anytime • Partner branch staffs don't need to update menu status on the tablet (the feature is still available on the tablet)
Menu sync notification (Optional)	LINE MAN notifies partner about the menu sync result • SUCCESS • FAILED

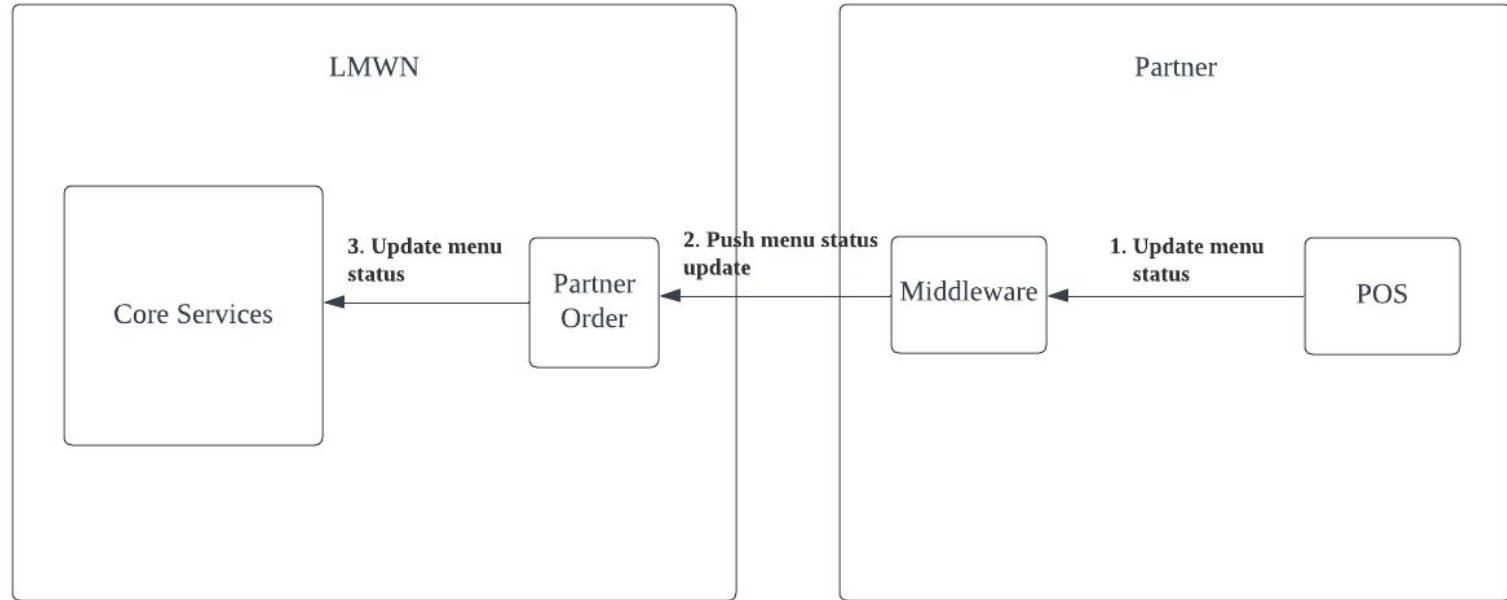

Sync Menu Workflow

Sync Menu Workflow

API	Definition
Menu sync	Partner can sync menu to LINE MAN. Whenever the menu/menu status are changed on the partner system, partner needs to push the entire menu snapshot to LINE MAN. • We currently support only push menu workflow • Partner branch staffs don't need to update menu status on the tablet (the feature is still available on the tablet) • Avoid peak hours (10:00 - 14:00/17:00 - 19:00)
Trigger sync menu	Allow LINE MAN to trigger sync menu to partner, if there is any error in the sync menu process and LINE MAN knows it.
Menu sync notification (Optional)	LINE MAN notifies partner about the menu sync result • SUCCESS • FAILED

Sync Menu Status Workflow (Optional)

Note: This API will only sync the menu status.

Sync Menu Status Workflow (Optional)

API	Definition
Update menu item status (Optional)	Partner can sync menu item status for some menus. • AVAILABLE (default) • SOLD_OUT_TODAY • SUSPENDED
Update menu propertyValue status (Optional)	Partner can sync menu option item status for some option. • AVAILABLE (1) • SOLD_OUT_TODAY (2) • SUSPENDED (3)

Menu Promotion

Process for Menu Synchronization (Menu Promotion = LINE MAN Promotion)

- **Promotion Agreement:** Menu promotions to be displayed are agreed upon between **LINE MAN BD** and the **Partner's business team**.
 - *Agree result in brief file*
- **Promotion Setup:** The **LINE MAN Operations team** sets up the promotion on the LINE MAN side based on the brief file provided by the business team.
- **Menu Sync:** The Partner syncs their menu into LINE MAN.
 - *The **menuName**, **menuProperty**, **menuPropertyValue**, **Price** of the promotion must **exactly match** the promotion configured on the LINE MAN side.*
 - *If they do not match, the promotion will not be orderable, and one of the teams must correct it.*
 - *Menu pictures must be sent to **LINE MAN BD**.*
- **Testing:** Normally, the menu sync is tested first in the **test environment** to verify correctness and to test order placement.

How the System Differentiates Normal Menu vs. LINE MAN Promotion

- The system detects promotion menus from items whose names start with [Promotion].
- **Important Rule:** Do not use [Promotion] as a prefix in normal menu item names — it is reserved exclusively for promotions.
- Example JSON used in menu sync to create a LINE MAN Promotion

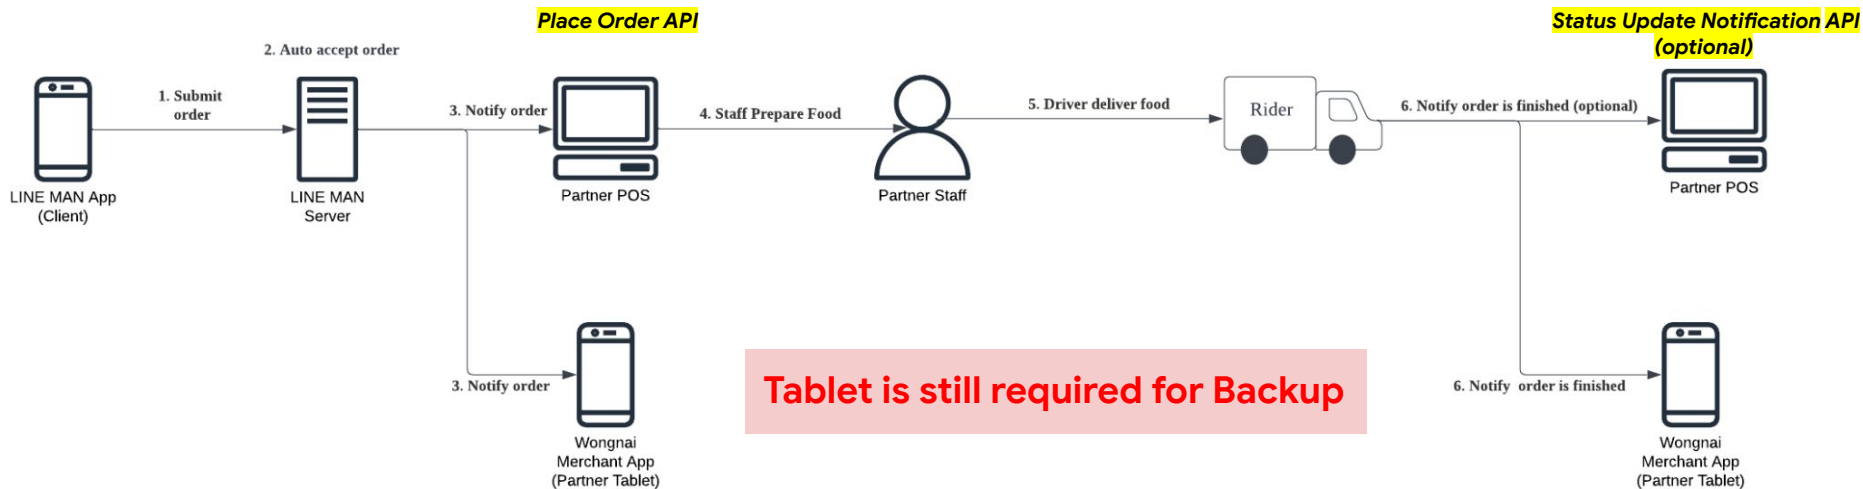

```
"menuItems": [  
  {  
    "id": "ITEM001",  
    "name": {  
      "thai": "[Promotion] Iced Caffe Americano",  
      "english": "[Promotion] Iced Caffe Americano"  
    },  
    "description": {  
      "thai": "กาแฟอเมริกาโน่เย็นชงผสมน้ำและน้ำแข็ง (เฉพาะช่องทาง delivery เท่านั้น)",  
      "english": "Rich espresso and pure water poured over ice. (Delivery Channel Only)"  
    },  
    "price": 120,  
    "menuStatus": "AVAILABLE",  
    "photoUrl": "",  
    "startSellingTime": 0,  
    "endSellingTime": 1439,  
  },  
]
```

```
"properties": [  
  {  
    "id": "OPTION001",  
    "name": {  
      "thai": "Size Pick",  
      "english": "Size Pick"  
    },  
    "type": "1",  
    "min": 1,  
    "max": 1,  
    "values": [  
      {  
        "id": "CHOICE001",  
        "name": {  
          "thai": "Tall (12 บาท)",  
          "english": "Tall (12 baht)"  
        },  
        "price": 0,  
        "status": 1  
      },  
      {  
        "id": "CHOICE002",  
        "name": {  
          "thai": "Grande (16 บาท)",  
          "english": "Grande (16 baht)"  
        },  
        "price": 15,  
        "status": 1  
      },  
      {  
        "id": "CHOICE003",  
        "name": {  
          "thai": "Venti (20 บาท)",  
          "english": "Venti (20 baht)"  
        },  
        "price": 30,  
        "status": 1  
      }  
    ]  
  }  
]
```

Order

API Walkthrough

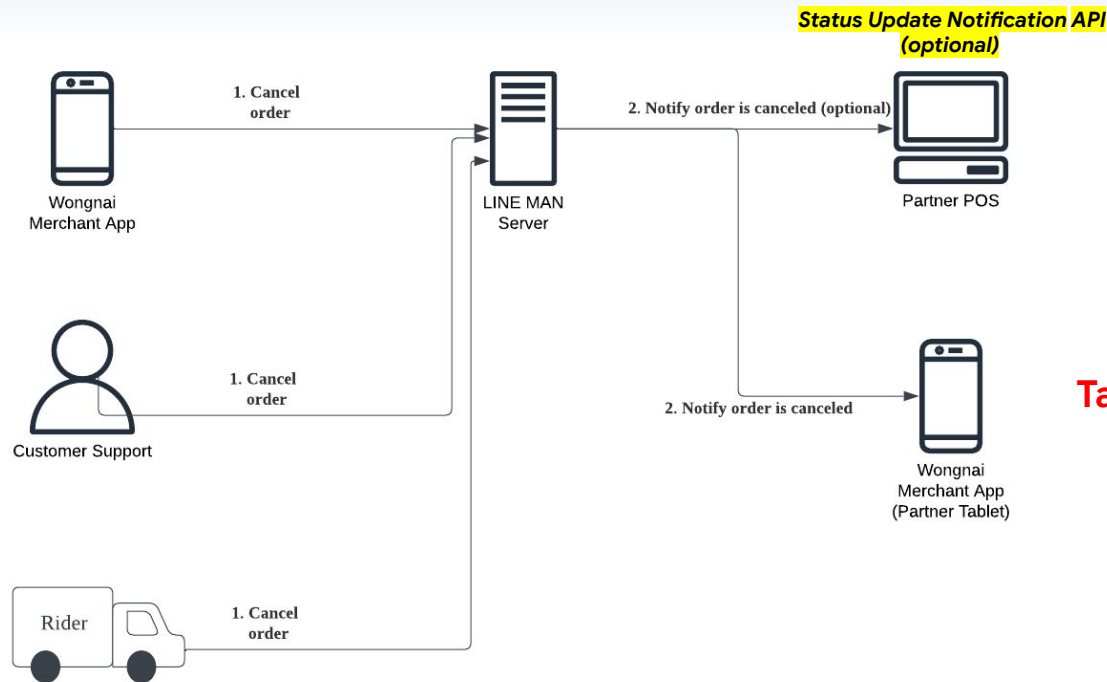

Sync Order Workflow

Sync Order Workflow

API	Definition
Place order notification	LINE MAN notifies new order contains all order details including price, items, order id etc.
Status update notification (optional)	LINE MAN notifies order status if the order status is finished or canceled.

Cancel Order Workflow (Optional)

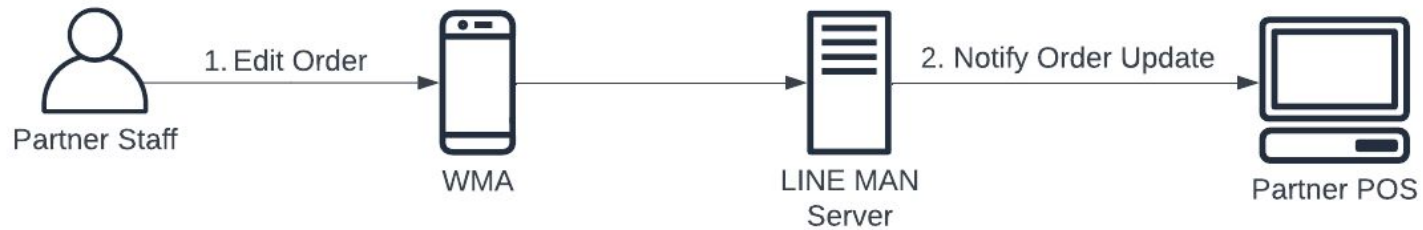

Tablet is still required for Backup

Cancel Order Workflow (Optional)

API	Definition
Status update notification (optional)	LINE MAN notifies order status if the order status is finished or canceled.

Order Update Notification Workflow (Optional)

Order Update Notification Workflow (Optional)

API	Definition
Order update notification (optional)	LINE MAN notifies order detail change if the order is edited

Perform Operation Actions

แก้ไขหรือยกเลิกออเดอร์

พร้อมจัดส่ง

Ready to Pickup (optional)

- Can be done on WMA app

Cancel Order - required WMA App

- Update order status to POS

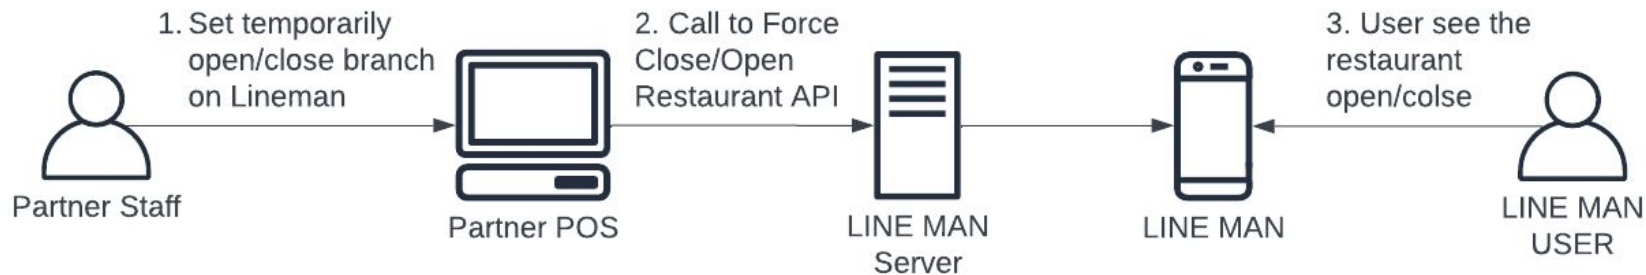

Edit Order - required WMA App

- Update order detail to POS

Restaurant

API Walkthrough

Force Close/Open Restaurant Workflow (Optional)

Force Close/Open Restaurant Workflow (Optional)

API	Definition
Force close/open restaurant (optional)	Partner can force close/open their store on LINE MAN from their POS

API Summary (4 mandatory, 6 optional)

[API Spec \(Master\)](#)

Scope	API	Required	Definition
Authentication	Authentication	Mandatory	Partner system can access to LINE MAN system
Menu	Menu sync	Mandatory	Partner can sync menu to LINE MAN.
Menu	Trigger sync menu	Mandatory	LINE MAN can trigger sync menu to partner
Menu	Menu sync notification	Optional	LINE MAN notifies partner about the menu sync result
Menu	Update menu item status	Optional	Partner can sync menu item status for some menus
Menu	Update menu propertyValue status	Optional	Partner can sync menu option item status for some option
Order	Place order notification	Mandatory	LINE MAN notifies new order contains all order details including price, items, order id etc.
Order	Status update notification	Optional	LINE MAN notifies order status if the order status is finished or canceled.
Order	Order update notification	Optional	LINE MAN notifies order detail change if the order is edited
Restaurant	Force close/open restaurant	Optional	Partner can force close/open their store on LINE MAN from their POS

Onboarding Store to Integration

Onboarding Store to Integration

- **Store ID Submission**
 - *Partner provides the store ID to LINE MAN BD to initiate integration.*
- **LINE MAN Setup (SLA: 4 working days)**
 - *LINE MAN team binds the store by linking store ID, partner, and restaurant ID (RID).*
- **Menu Synchronization**
 - *Partner syncs menu data into LINE MAN.*
 -  *The synced menu will immediately affect the store's live (production) menu.*
- **Enable Integration**

Contact Point

Contact Point

- **Contact Channel:** *Line Group*
- **Menu/Promotion Setup, Sync Menu:** *Business Development*
- **Others (Technical, Features):** *LINE MAN Technical Team (App Support, Product Engineering Team)*
